--	-----------------------------

Distribution of USFE Release 1.0 Front-end Installation Kits for Production

USFE Release 1.0 Front-end Installation Kits will be distributed via the network between February 16 and February 21, 2007. Installation Kits will be available in the following MISS directories:

SUN Solaris (MISS): /opt/gate/transferdir/release40/sun
Windows (MISS): <ftp-root directory>\release40\win

In order to successfully receive the kits, MISS systems must be available via the network (ftp and ftp-login). A minimum of 120 MB available disk space is required to store the kit on the MISS.

Installation Kits are also available for download in the member section of the website (<http://www.USFE.com>).

For installation instructions, please refer to the "readme" file provided with the USFE Release 1.0 Front-end Installation Kit and the respective USFE Release 1.0 Front-end Installation Guide (http://www.usfe.com/members_releases.html).

The following are prerequisites for successful installation of the USFE Release 1.0 Front-end Installation Kits.

Sun Solaris 10, HW03/05 or later (MISS/Workstation), Windows2003, Service Pack 1 (MISS only) and Windows XP, Service Pack 2 (Workstation only), and successful installation of GATE 3.5

For technical issues, please contact the Technical Helpdesk at +1-312-544-1110. For general inquires, please contact Member Services at +1-312-544-1144.
