U.S. Futures Exchange Member Simulation Release 1.0

Attached is an extension of the current simulation calendar detailing information for November 6, 2006, through January 28, 2007. The simulation environment will close at 3:10 PM (CST) November 17, 2006, and will not re-open until December 11, 2006. During this closure, the system conversion from Eurex US 1.0 to USFE 1.0 will take place.

In preparation for the conversion, all products—except for the Russell 1000 and 2000 contracts—will be removed from the simulation environment after trading closes on November 16, 2006. Information regarding the Member Simulation Guide and USFE 1.0 Release Kit will be distributed to USFE members during the week of November 13, 2006.

Please refer to addendum 16A, "USFE Simulation Trading Calendar Nov. 6, 2006 to Jan. 28, 2006," for the calendar.
